# Sealers

Ensure your artistry stays beautiful from day one. Perfect for safeguarding decorative overlays, Westcoat sealers are also ideal for general concrete sealing and maintenance of everyday areas. Low odor and ultra tough, the Westcoat line includes a water-based acrylic and a water-based two part polyurethane. Also part of our SC line are solvent-borne urethanes and solvent-borne acrylic lacquer sealers. All sealers may be used with Westcoat Safe-Grip for a desired non-skid finish.

#### **SC-42 Hybrid Acrylic Sealer**

As an easy to use acrylic with the performance similar to polyurethane, this water-based, clear concrete sealer and glaze is a quality blend of high performance acrylic and perfect for sealing concrete and overlays.

#### **SC-65/66 Water-based Polyurethane Sealer**

These two component, high solids, water-based, polyurethane sealers provide properties equal to that of traditional urethanes with fewer health and environmental concerns. Available in a gloss or satin version. Choose SC-65 for a high gloss finish or SC-66 for a satin finish.

#### **SC-70 Acrylic Lacquer Sealer**

This solvenated, fast drying, acrylic sealer, also known as Stone Glaze, offers high gloss, UV and stain resistance and is designed to create a glazed look.

#### **SC-75 Polyurethane Sealer**

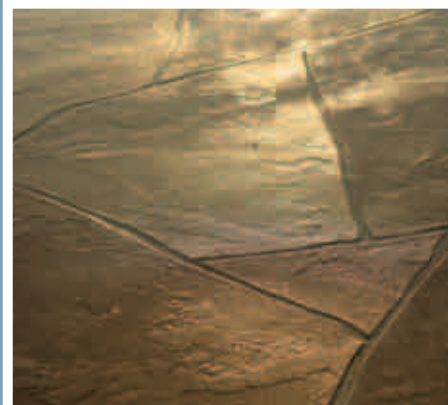

This solvenated polyurethane sealer and glaze is very hard, offers better gloss, UV resistance, and stain resistance than most other sealers.

#### **SC-20/21**

Sodium Silicates and Lithium Silicates are essential elements for hardening and densifying concrete. Use in concrete polishing processes and dust proofing. Perfect for Westcoat's Fast Stain applications.

#### **Advantages**

- Protective
- Long-lasting
- UV and water resistant
- Water-based or solvent-based
- Clear, non-yellowing
- Durable
- High gloss or satin options
- Easy to use
- Fast drying
- Excellent adhesion
- Chemical-resistant
- VOC compliant
- Cost effective
