TC Slope & Patch

Westcoat's TC Slope & Patch is a mixture of Acrylic Cement and WP-81 Cement Modifier, developed to aid in patching, sloping or repairing concrete or in conjunction with Texture Crete, MACoat or ALX. TC Slope & Patch is perfect for feather patching or larger sloping projects. Ideal for patching broken or chipped concrete, has excellent adhesion and maintains a "concrete look".

TEXTURE COAT
DECORATIVE TEXTURED SURFACES

westcoat

Add texture. Add dimension.

Our Texture Coat product line transforms plain concrete into decorative, durable, textured works of art. Texture Coat's finishes work equally well on old or new concrete and are perfect for simulating the look of flagstone, slate, stone, pavers, tile, or create a look all your own.

Durable and water resistant

TC Slope & Patch is strong enough to stand up to the most demanding wear and tear. With added Cement Modifier porosity is reduced.

Fast drying

Finish jobs in less time. TC Slope & Patch dries quickly for savings in time and labor. Cement Accelerator can be used to expedite drying.

Minimal shrinkage

Patch and fill once. TC Slope & Patch delivers minimal shrinkage for long lasting wear.

Feather patch or slope

TC Slope & Patch can be used to smooth out or level uneven concrete or decks, eliminating trip hazards or to expedite drainage.

Patch don't replace

Using the TC Slope & Patch system can effectively eliminate premature concrete replacement. With proper patching techniques, increase the service life of your existing slab.

Advantages

- Fast drying
- Minimal shrinkage
- Cost effective
- Easy to use
- High strength, over 3000 psi
- Can be feathered or built up
- Blends with existing concrete
- Can be tinted
- Excellent adhesion
